

<b>Unit Title</b>	<b>Deep clean equipment in premises and facilities</b>
<b>Ofqual unit reference number (code)</b>	L/601/6554
<b>Organisation Reference</b>	QU012829
<b>Unit Level</b>	Level 2
<b>Unit Sub Level</b>	None
<b>GLH</b>	39
<b>Unit Credit Value</b>	6
<b>Sector Subject Areas</b>	<ul style="list-style-type: none"> <li>• 1.4 Public Services</li> <li>• 5.2 Building and Construction</li> <li>• 7.3 Service Enterprises</li> </ul>
<b>Unit Grading Structure</b>	Pass
<b>Availability</b>	Shared
<b>Restricted Organisations</b>	N/A
<b>Assessment Guidance</b>	N/A

<b>LEARNING OUTCOMES</b>	<b>ASSESSMENT CRITERIA</b>
<b>The learner will:</b>	<b>The learner can:</b>
<p>1. Understand how to prepare for deep clean equipment and surfaces.</p>	<p>1.1. Explain the importance of having an up to date cleaning specification and where it can be found.</p> <p>1.2. State the importance of maintaining standards of personal hygiene when cleaning.</p> <p>1.3. State the importance of removing personal items prior to cleaning and where they should be found.</p> <p>1.4. State the importance of wearing appropriate personal protective equipment and for others to see it being worn.</p> <p>1.5. Describe the best methods and materials for carrying out deep cleaning, identifying possible alternatives.</p> <p>1.6. Explain how the following factors might affect the type of cleaning required: <ul style="list-style-type: none"> <li>• type of soiling</li> <li>• type of surface</li> <li>• position</li> <li>• amount of soiling</li> </ul> </p> <p>1.7. Explain how to check that the equipment and surface is suitable for the treatment.</p>

	<p>1.8. Explain the importance of reporting damaged and deteriorating surfaces.</p> <p>1.9. State why the selected treatment might not be suitable.</p> <p>1.10. Explain the importance of reporting immediately any concerns about the deep clean.</p> <p>1.11. State how to ventilate the work area.</p> <p>1.12. State additional customer or manufacturer's standards that may need to be applied to the work surface and equipment.</p>
<p>2. Understand how to deep clean equipment and surfaces.</p>	<p>2.1. Describe why there are checks and restrictions in place for the use of deep cleaning equipment.</p> <p>2.2. Describe how to check that equipment is in safe working order.</p> <p>2.3. State the organisational requirements for reporting problems with equipment.</p> <p>2.4. State the importance of removing superficial dust and debris.</p> <p>2.5. Describe how to soften ground-in soil and stains.</p> <p>2.6. State the importance of softening ground in soiling.</p> <p>2.7. Explain how to select the most appropriate place to carry out test cleans.</p> <p>2.8. Explain why test cleans should be carried out before applying treatments.</p> <p>2.9. Explain why treatments should be applied evenly.</p> <p>2.10. State when equipment and surfaces should be pre-treated.</p> <p>2.11. State how long the treatment should take to work.</p> <p>2.12. State where to find the manufacturer's instructions for:</p> <ul style="list-style-type: none"> <li>• disassembling and re-assembling equipment</li> <li>• applying treatments</li> <li>• operating equipment</li> </ul> <p>2.13. State why it is important to follow manufacturers' and organisational requirements.</p>

<p>3. Understand how to restore the deep clean area.</p>	<p>3.1. Describe what to look for when checking the cleaned area and equipment.</p> <p>3.2. State which treatments require rinsing.</p> <p>3.3. Describe why and how rinsing of treatments should be carried out.</p> <p>3.4. State the organisational requirements for reporting soiling or stains that cannot be removed.</p> <p>3.5. State factors which might mean another treatment is required.</p> <p>3.6. Describe the importance of putting items back in their original place after cleaning.</p> <p>3.7. Describe how to check for pest infestation.</p> <p>3.8. State the organisational requirements for reporting pest infestations.</p> <p>3.9. State why it is important to check that equipment is working properly.</p> <p>3.10. Explain the procedures for the disposal of used and unused treatments and why this is important.</p> <p>3.11. State the importance of cleaning equipment after use.</p> <p>3.12. State where cleaning treatments, equipment and machinery should be stored.</p> <p>3.13. Describe the importance of cleaning and checking personal protective equipment after use.</p> <p>3.14. State the organisational requirements for storing and disposing of personal protective equipment.</p>
<p>4. Be able to prepare to deep clean equipment and surfaces.</p>	<p>4.1. Locate the relevant cleaning specification and describe what is required to do the task.</p> <p>4.2. Remove personal items and store them correctly.</p> <p>4.3. Select and wear appropriate personal protective equipment for the task.</p> <p>4.4. Select the appropriate equipment and materials for each cleaning task taking into account surface and type of soiling.</p> <p>4.5. Check that the equipment is serviceable.</p> <p>4.6. Check that the surface and equipment is suitable for the planned treatment.</p> <p>4.7. Report damaged equipment and surfaces which are deteriorating.</p>

	<p>4.8. Contact the appropriate person for advice on:</p> <ul style="list-style-type: none"> <li>• soiling</li> <li>• surfaces that could be damage by cleaning</li> <li>• health risks of using a substance</li> </ul> <p>4.9. Check the work area for factors which may affect the clean.</p> <p>4.10. Ensure that power supplies are isolated and protected during cleaning.</p> <p>4.11. Ventilate the work area.</p> <p>4.12. Check for authorisation to use any deep cleaning equipment prior to use.</p> <p>4.13. Check whether there are any additional requirements from the customer regarding the deep clean.</p> <p>4.14. Report any reasons for not using the specified equipment.</p>
<p>5. Be able to undertake deep cleaning of equipment and surfaces.</p>	<p>5.1. Remove superficial dust and debris before stating the deep clean.</p> <p>5.2. Soften ground-in soil and stains before trying to remove them.</p> <p>5.3. Conduct a test clean in an area where marks are least likely to be noticed.</p> <p>5.4. Follow manufacturer's instructions when disassembling equipment.</p> <p>5.5. Apply the treatment safely, evenly and methodically following manufacturer's instructions and without over-wetting or damaging the surface.</p> <p>5.6. Ensure that absorbent patches are pre-treated and that stubborn and ingrained stains are given concentrated treatment.</p> <p>5.7. Protect furniture and equipment in areas where a wet treatment is being used.</p> <p>5.8. Follow the manufacturers' and organisational requirements in the safe use and disassembly of machinery and equipment.</p> <p>5.9. Ensure safety of self and others throughout the cleaning process.</p>
<p>6. Be able to restore the work area for use.</p>	<p>6.1. Check the cleaned surface for an even appearance.</p> <p>6.2. Ensure the surface is left free from dirt and excess moisture.</p>

	<ul style="list-style-type: none"> <li>6.3. Rinse treated surfaces if necessary without disturbing the surrounding area.</li> <li>6.4. Apply protective coatings and treatments if necessary.</li> <li>6.5. Reinstate the work area.</li> <li>6.6. Check that no residues remain on furniture and equipment.</li> <li>6.7. Check for and report any signs of pest infestation.</li> <li>6.8. Check that equipment with moving parts is working after the deep clean.</li> <li>6.9. Report any defects and damage caused during cleaning.</li> <li>6.10. Dispose of used and un-used solutions according to manufacturer's instructions.</li> <li>6.11. Clean the equipment after use.</li> <li>6.12. Store cleaning agents and treatments in a safe and secure place.</li> <li>6.13. Store the equipment after use.</li> </ul>
